Country List for Adobe Lightroom

Since two months I am am using Adobe Lightroom 3 to organize and process my photographs.

I wanted to start with a clean list of continents, countries and regions to be used as keywords in Adobe Lightroom.

Therefore I compiled this keyword list from United Nations data and added "World" as root on top.

The structure looks like this

Â

- World
    - Africa
        - Eastern Africa
            - Burundi
            - Comoros
            - Djibouti
            - …

Please feel free to download the list **here** and use it under the Attribution-NonCommercial-ShareAlike License.
