Dax Outlook 2014 W11

Last week the Dax feel to 9’346 and continued to fall this Monday.

The MACD is bearish now the RSI is low in the neutral area and the VDAX has risen sharply to 16.89.

The support at 9’500 did not hold.Â The next stronger supports are 9’075 and 9’000. I am quite undecided but could picture a little contermove upwards before testing the 9’075 support this week.
